Calian® Corolar™

Bridging the Gap in Healthcare Interoperability and Elevating Patient Care

Connected care and interoperability are vital components of modern healthcare, striving to enhance the quality of patient care while improving the efficiency of healthcare systems.
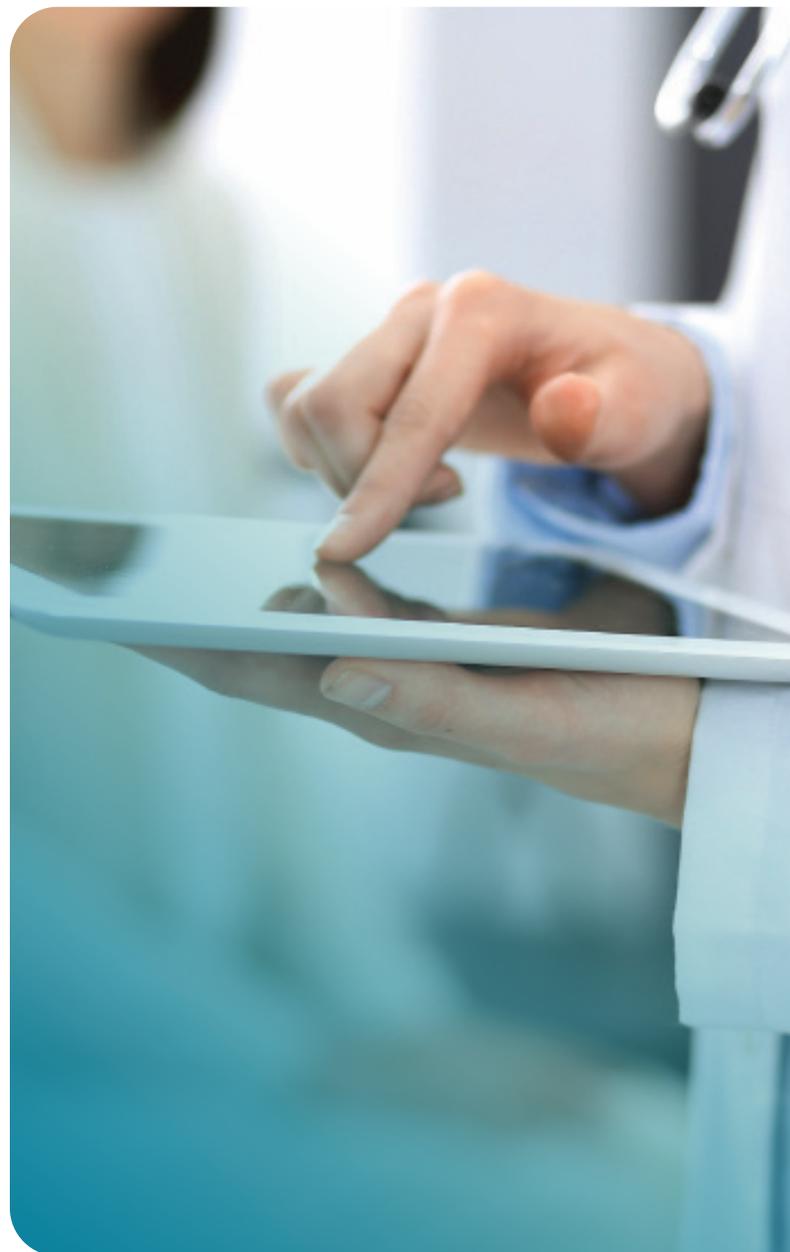

Calian Corolar is an interoperability platform that enables enterprises and healthcare organizations to implement and manage data, applications, APIs, and process integration projects involving any combination of cloud-resident and on-premises endpoints.

Why Corolar?

The Corolar Healthcare Interoperability Platform is a cloud-native, healthcare-specific integration solution built for better data sovereignty and minimal risk exposure. Corolar is an award-winning Interoperability Platform that can be deployed to public cloud instances and provides sophisticated integration features and unmatched control and ownership.

Benefits:

- Reduces data silos by integrating from disparate sources: hospital, clinical, community
- Reduces total cost of ownership (TCO) and time to delivery
- Leverages a secure platform and Microsoft ecosystem

Microsoft
Solutions Partner

Healthcare integration platform as a service (iPaaS) for smarter and faster interoperability
Cloud native MLLP connector for HL7

Smarter Integration Environment

- Integration platform as a service (iPaaS) built for healthcare on Microsoft Azure
- Supports legacy and emerging healthcare standards and formats—HL7, XML, JSON, CDA, C-CDA, FHIR and others
- Connect over multiple transport protocols—MLLP, HTTP, FTP, Rest and others
- Transport and transform healthcare data from any-to-any format and protocol

Faster Integration Development

- Browser-based dashboard for full interface lifecycle management—build, deploy and manage
- Simple UI to easily build and quickly deploy clinical integration interfaces
- Quickly test interfaces as you define and build them
- Easily monitor and control interfaces with configurable alerts and notifications

Drive Innovation and Interoperability

- Integrated real-time clinical data platform to support clinical data repositories
- Collate clinical records across HIS in real time
- Easily links with best-of-breed health analytics systems
- Develop and manage APIs to clinical data

Native iPaaS Solution on Microsoft Azure

- Keep your existing interface engine
- No software to install, pay as you go and scale as you need
- Capable of running on private and public cloud
- HIPPA certified
