

Calian Guam teleport

Satellite

A global gateway teleport bridging the US and Asia Pacific regions with the rest of the world.

Terrestrial Fiber Networks

Easy access to multiple trans-Pacific fiber networks as well as diverse and redundant local loops.

Experienced Staff

Our experienced and expert staff is accessible 24x7 to ensure your critical communication paths are always available. Customer service is our top priority.

Global Reach

We work with a variety of partners to facilitate connectivity and related services in every part of the world, seamlessly and efficiently.

Calian takes pride in offering an expanded teleport footprint with our new Guam teleport. The Guam Teleport is located in Pulantat, Guam (13.25 0° N, 144.4457° E) Our joint customer relationships will aid in providing services including:

- **Media Content Distribution and Backhaul**
Live events, occasional use; broadcast turnaround; time delaying, head-end, aggregation and distribution
- **Mobility**
Monitoring and guidance for vessel locations, velocity, and emergency services; mobile content delivery to ships and planes; remote traffic and logistics management; inflight entertainment and WiFi in the sky
- **Military and Government Agency Services**
Secure network and transmission services; Access to PACOM and DISA sites via fiber
- **Oil & Gas (On & Offshore)**
Crew welfare; real time performance metrics
- **Disaster Recovery**
Fiber backup, Cellular backhaul; direct access to fiber carriers; internet backbone presence for cloud services
