

# TW3967XF

## Embedded Multi-Constellation Triple-Band Antenna

Frequency Coverage: GPS L1, L2, L5 | GALILEO E1, E5a, E5b | BEIDOU B1, B2a, B2b | GLONASS G1, G2, G3 | NavIC L5 + L-Band

The TW3967XF is an embedded precision-tuned triple-band Accutenna® technology antenna providing coverage for triple-band GPS/QZSS-L1/L2/L5, GLONASS-G1/G2/G3, Galileo-E1/E5a/E5b, BeiDou-B1/B2b/B2a, NavIC-L5, including the satellite-based augmentation system (SBAS) available in the region of operation [WAAS (North America), EGNOS (Europe), MSAS (Japan), or GAGAN (India)], plus L-band Corrections. It is especially designed for precision triple-frequency positioning.

The radio frequency spectrum has become more congested as new LTE bands are activated and their signals or harmonic frequencies [e.g.  $800\text{MHz} \times 2 = 1600\text{MHz}$  (GLONASS-G1)] can affect GNSS antennas and receivers. In North America, planned Ligado signals at 1525 - 1536 MHz can especially impact GNSS antennas that support space-based L-band Corrections (1539 - 1559 MHz). New LTE signals in Europe [Band 32 (1452 - 1496 MHz)] and Japan [Bands 11 and 21 (1476 - 1511 MHz)] have also been observed to interfere with GNSS signals. In addition, Inmarsat satellite communication (uplink: 1626.5 - 1660.5 MHz) can also affect GNSS signals. The new Tallysman XF antennas have been designed to mitigate out-of-band signals and prevent GNSS antenna saturation. Calian's custom XF filtering mitigates all existing signals and new Ligado and LTE signals, enabling the antennas and attached GNSS receivers to perform optimally.

Ideal for autonomous vehicle tracking and guidance, precision agriculture, and other applications where precision matters, the TW3972XF provides superior multipath signal rejection, a linear phase response, and tight phase centre variation (PCV).

The TW3967XF features a precision-tuned, twin circular dual-feed, stacked patch element. The signals from the two orthogonal feeds are combined in a hybrid combiner, amplified in a wideband LNA, then band-split for narrow filtering in each band and further amplified prior to recombination at the output. The antenna also has a strong pre-filter to mitigate inter-modulated signal interference from Ligado, LTE and other cellular bands. The TW3967XF offers excellent axial ratio and a tightly grouped phase centre variation.

The standard TW3967 antenna (28 dB gain) and the low-gain extended-filter TW3967LGXF antenna (20 dB gain) are also available.

### Applications

- Autonomous vehicle tracking and guidance
- Triple-frequency RTK and PPP receivers
- Precision GNSS position
- Precision agriculture
- Network timing & synchronization
- Law enforcement and public safety

### Features

- Very low noise preamp (< 2.0 dB typ.)
- Low axial ratio (< 2.0 dB typ.)
- Tight phase centre variation
- LNA gain (28 dB typ.)
- Low current (32 mA typ.)
- ESD circuit protection (15 kV)
- Invariant performance from 2.5 to 16 VDC

### Benefits

- Excellent interference mitigation
- Excellent multipath rejection
- Increased system accuracy
- Excellent signal-to-noise ratio
- CE RED, RoHS, and REACH compliant

**About Calian:** With global headquarters and manufacturing in Ottawa, Canada, Calian is a leading manufacturer of high-precision antennas and components for Global Navigation Satellite System (GNSS) applications. Calian's mission is to support the needs of a new generation of positioning systems by delivering unprecedented antenna precision at competitive prices. # Embedded Multi-Constellation Triple-Band Antenna

Frequency Coverage: GPS L1, L2, L5 | GALILEO E1, E5a, E5b | BEIDOU B1, B2a, B2b | GLONASS G1, G2, G3 | NavIC L5 + L-Band

Antenna - Measured with a 100 mm ground plane

Technology Dual-feed stacked RHCP ceramic patch

		Gain	Axial Ratio
		dBic typ. at Zenith	dB at Zenith
GNSS			
GPS / QZSS	L1	4.0	< 1.0
	L2	4.0	< 1.0
	L5	-1.5	< 1.5
GLONASS	G1	2.5	< 1.5
	G2	2.5	< 1.5
	G3	2.5	< 1.5
Galileo	E1	4.0	< 1.0
	E5A	-1.5	< 1.5
	E5B	2.5	< 1.5
	E6	-	-

Globalstar		-	-
Other			
Axial Ratio at 10°		-	Efficiency
PCV $\Phi > 15^\circ$		$\pm 10$ mm	PCO

## Mechanicals

Size	62 mm (dia.) x 17 mm (h.) (see diagram)
Weight	70 g
Radome	-
Mount	5 x M2 screws
Available Connectors	Please refer to ordering guide

## Environmental

Operating Temperature	-40 °C to +85 °C
Storage Temperature	-55 °C to + 95 °C
Vibration	MIL-STD-810D Method 514.3-1
Shock	Vertical axis: 50 G, other axes: 30 G
Salt Fog	MIL-STD-810F Section 509.4
Other Tests	-
IP Rating	-
Compliance	IPC-A-610, FCC, CE RED, RoHS, REACH

## Warranty

Parts and Labour	1-year standard warranty
------------------	--------------------------

Low Noise Amplifier (LNA) - Measured at 3V and 25°C

Frequency Bandwidth		Out of Band Rejection
Lower Band	1164 - 1254 MHz	$\geq 70$ dB @ $\leq 1050$ MHz $\geq 65$ dB @ $\leq 1125$ MHz $\geq 70$ dB @ $\geq 1350$ MHz
L-Band Corr.	1539 - 1559 MHz	$\geq 65$ dB @ $\leq 1500$ MHz $\geq 45$ dB @ $\leq 1525$ MHz $\geq 05$ dB @ $\leq 1536$ MHz $\geq 30$ dB @ $\geq 1626$ MHz $\geq 65$ dB @ $\geq 1650$ MHz
Upper Band	1559 - 1606 MHz	

Architecture	eXtended Filtering
Gain	28 dB typ.
Noise Figure	2.0 dB typ.
VSWR	< 1.5:1 typ., 1.8:1 max.
Supply Voltage Range	2.5 to 16 VDC nominal, up to 50mV p-p ripple
Supply Current	32 mA typ.
ESD Circuit Protection	15 kV air discharge
P 1dB Output	11 dBm typ.
Group Delay	-

Mechanical Diagram - Units in 'mm' or 'inches' where specified

## Ordering Information

Part Number	33-3967XF-xx-zzzz
Where xx = connector type, zzzz = cable length in mm (where applicable)	

Please refer to our **Ordering Guide** to review available radomes and connectors at:
